

The Daily Gazetteer.

WEDNESDAY, OCTOBER 6. 1742.

Yesterday arriv'd A Mail from Holland.

Stockholm, Sept. 21.

HE Publick has again recovered the Generals Lewenhaupt and Bodenbrock; they landed some time ago at Flygland, Ten Leagues from hence, and thought proper to keep themselves incognito. We expect with impatience to see whether these Gentlemen will be arrested, or whether they will be left at Liberty to come hither when they judge it proper. The Gallies are arrived at the Mouth of the Scheres, with the poor Remains of our Army from Finland. They make but a very inconsiderable Body; for the Finanders having Permission to remain in their own Country, resign'd the Arms of their respective Regiments, and withdrew to their own Homes. It is impossible to paint the Detraction of the People here, on this surprizing Turn of Affairs; instead of that Clamour which reigned a few Days ago, a sullen Silence prevails, the Effects of which may prove fatal to such as shall appear to the Dyst to have abused or betrayed their Country.

Rome, Sept. 22. We had on the 16th a greater Bustle at the Quirinal than most People remember. General de Gages, a Fleming, who commands the Spanish Army in Chief at present, had represented strongly to his Holiness the Necessity he was under of taking Winter-Quarters in the Ecclesiastical State. The Pope immediately sent for Cardinal Aquaviva, and told him plainly he was determined never to consent to it, since it must infallibly rekindle the War by bringing back the Austrians. His Eminence did all that lay in his Power to shew the Necessity of this Step, and at the same time gave the most solemn Assurances that strict Discipline should be maintained, and that these Troops should be speedily remov'd. The Pope remaining steady in his Resolution, sent for the Courier Doria, to carry a Dispatch importuning as much to Madrid; upon which the Cardinal sent for the Courier Bruno to carry his Packet.

At last this great Dispute was adjusted, and the Pope was prevail'd on to wait the Return of the Courier Nichi, who had been sent with the same Resolution when Quarters had been demanded by the Duke de Montemar. We have been since inform'd that the Courier last-mentioned fell into the Hands of the English in his Passage from Genoa to Antibes, who no sooner knew that he was bound for Madrid than they opened all his Letters, which however they return'd when they were acquainted with their Contents; they next stripp'd him almost to the Skin, and then set him on shore. At Antibes however he found a Person who furnish'd him with Cloaths and Money to continue his Journey. His Sicilian Majesty has discharged very honourably all the Demands upon his Army, for Forage and Provisions. We have just received Advice that the Spanish Troops are arrived at Rimini, and that when they were reviewed a few Days ago they amounted to 16,538 effective Men.

Vienna, Sept. 29. The Queen our Sovereign was entertain'd on the 27th at Luxembourg by Count Keyenhuller, Privy Counsellor and Commissary for Bohemia. In the Afternoon there was a Play, with which her Majesty was extremely well entertain'd. Count Nicholas Esterhazy is appointed her Majesty's Plenipotentiary at the Court of Dresden, where a new Negotiation is commenced, and which we are told is of the last Importance. This Day a Council was held on some Expresses from Italy, and two Hours after it rose a Courier was dispatch'd to Count Traun with the Result, and it is said he has Orders to attack the Spaniards, if they return into the Ecclesiastical State, or make any other Motion which tends to create a Diversion in favour of Don Philip.

From the Austrian Camp near Plan, Sept. 29. On the 24th of this Month Prince Lobkowitz arriv'd with 20,000 Men near St. Croix, where he intrench'd himself. On the 25th the whole Army pass'd by the Forest, and intrench'd at Bromhoff, having the Forest behind them. On the 26th Count Keyenhuller arrived at St. Croix with Part of his Army, his Excellency having left 10,000 Men at Platling, under the Command of Baron Berenczau. The Head Quarters are now here, and Prince Charles of Lorraine, Prince Lobkowitz, and Veldt Marshal Kevenhuller are very near each other, and at a small Distance is that of General Nadaffi. There have been several little Rencounters between the two Armies, in which without Particularity we have always had the better. In one of these, General St. Valiere, who had lately the Misfortune to lose his Baggage, lost his Life. We are this instant beginning to cannoneade, and expect every Moment to be join'd by

7,000 Hussars, after which we shall endeavour, if the French are at all in the Humour, to decide the Fate of Bohemia in the Way peculiar to Men of Honour.

The Day before we left Pilsen, an honest Gentleman was apprehended just putting his Foot in the Stirrup for Prague. He had pass'd on us for a Person who had lost very considerable Effects at Chamb, which he had a mind to recover and redeem. In the Top of his Boots between the Leather was found a Letter from Marshal Broglie to the Governor of Egra, desiring a speedy Supply of Provision, and informing him that he was resolv'd to attempt getting thither with his Garrison. This Fellow's Heart fail'd him it seems, and he was encouraging to get back again when he was seiz'd. He underwent a long and strict Examination, after which he was hang'd up without any Ceremony.

P. S. This Moment Col. Mentzel is returned into the Camp with his Regiment of Hussars. He has beat a numerous Party of French Horse and Dragoons, commanded by the Count de Saxe in Person, and made about twenty Prisoners, all Officers, and some who are thought to be Persons of Distinction.

Ratisbon, Oct. 4. Contrary to all Expectation Veldt-Marshal Seckendorff has pass'd the Danube, and advanced to Abensberg, from whence he has detached some hundred Men towards Munich. The Governor of Straubingen having Information that the Austrians were embarking at Deckendorff the greatest Part of the Plunder they had taken at Chamb, sent a strong Detachment from his Garrison to make themselves Masters of it, but they arrived three Hours too late. They seized, however, the Post, and entrenched themselves. Field-Marshal Seckendorff receiving Advice from his Detachment, that there was not so much as an Austrian to be seen in all the Road to Munich, had made all the necessary Dispositions for marching directly to invest that Capital, when a Person of Distinction arrived at his Quarters, with indisputable Advice, that Baron Berenczau had received the great Reinforcement he expect'd from Tyrol, and was ris'd a little on one Side Munich, with Intent to surprise him; upon which the Field-Marshal abandon'd his Design, and was rais'd Possessor of an intrench'd Camp on the Banks of the Danube. This Morning Baron Berenczau's Billets to the Chief Magistrate of every District in the Neighbourhood of Straubingen have been brought hither as Curiosities; they run thus:

You, and every other District which shall have any Communication with the Town of Straubingen, are to expect to be punished with the utmost Rigor, by Fire and Sword. Such, on the contrary, as contain themselves sincerely within the Bounds of their Duty, may depend upon constant Protection, and all possible Favours.

Landau, Sept. 19, 1742.
Dresden, Oct. 1. The Garrison of Prague make their utmost Efforts to secure a free Communication on the Elbe, in order to receive Provisions from hence. Thirteen or fourteen hundred Head of black Cattle are arrived in the Neighbourhood of this City from Poland, which have been bought by the French Minister, as well for the Use of the City of Prague as for that of the Camp. We know not what to think of the present Situation of Affairs, but it is impossible we should continue in this Suspense long. We begin to credit a Report which has been lately rais'd, that 12,000 of our Troops are to join Prince Charles of Lorraine; and if this prove true, Marshal Maillbois will be infallibly obliged to quit Bohemia.

Frankfort, Oct. 7. His Imperial Majesty has already obtained the Consent of the Electoral College for a Subsidy of 50 Roman Months, which will amount to about two Millions and a half of Florins. It is thought pretty extraordinary that the Minister of Brandenburg should be the first who gave his Vote for it.

Paris, Oct. 5. M. de Leuze, Ambassador from the Republic of Venice, had a Publick Audience of the King on the first with great Ceremony, and at the Close of it receiv'd the Honour of Knighthood from his Majesty. It is currently reported here, that Cardinal Fleury has taken a Resolution to retire from Business entirely, which gains the more Credit because his Eminence has not been lately at Court. The Stories published in the Name of the Duke de Brissac are so extraordinary that they gain little Belief. This very Day a Courier has been dispatch'd with Orders of the utmost Importance to Marshal Maillbois. We are of Opinion here, that they enjoin him to use all imaginable Care to avoid a Battle, since the Loss of one in the present Conjunction could scarce be repaired.

Hague, Oct. 10. Lord Carteret will remain here till the latter End of the Week. Never was greater Respect paid to a Foreign Minister than to him, but as to his Business here it is an impudent Secret, as appears by

the different Stories that are told about it. The Imperial Minister applies himself with great Diligence to a certain Secret Negotiation which is carried on here, and of which however our best Politicians have little Hope. The Polish Minister General de Broglie, has received from the King his Master a Protest against the States of Juliers and Bergue paying Homage to the Prince of Sulzbach, which is conceived in very strong Terms, and it is thought will be attended with extraordinary Consequences.

L O N D O N.

Letters from Moscow assure us, that some Scheme of the last Importance to the Peace of the North, and the general Tranquility of Europe, has been concert'd between that Court and this, the Effects of which will immediately appear; and in the mean time the Empress expresses an extraordinary Respect for the British and Hungarian Ministers.

The Spanish Court are marching Troops and erecting Magazines in Catalonia, as if they intended a new Imbarcation for Italy; which will however be found impracticable.

The English Consul at Naples is said to be engaged in some Negotiations with that Court, tending to the Pacification of Italy, and the Advantage of our Trade in Naples and Sicily.

The Army of the Allies, on the March of the Spaniards to Rimini, have pass'd the Panaro, and in case the former perfid in their Design to make themselves Masters of Bollogna, a Battle must ensue.

His Sardinian Majesty only waits the Return of a Courier from Paris to put himself at the Head of the Troops which are on the Confines of Savoy, out of which Don Philip is already withdrawn to Grenoble.

M. Maillbois had form'd, in concert with M. Broglie, a Scheme for sending by the Way of Egra 12,000 Men to join and bring off the Garrison of Prague, which has been discover'd and prevented.

They write from Frankfort, that on the Motion of the Imperial Army under Count Seckendorff towards Munich, the Austrians had evacuated that Place, Landshut, and the other Posts on the Isar, and were march'd either towards the Tirol or to Paffau.

Private Letters from Frankfort advise, that Marshal Maillbois had inform'd the Emperor he was inclin'd to quit Bohemia, and retire to Amberg and Wertheim.

We hear from Leipzig, that as the Austrian Head Quarters were at Plan, it was impossible for the French, who were posted at a Place two Miles from Egra, either to advance or retreat without giving Battle; and that Egra was so crowded with sick and wounded Frenchmen, as even to occasion the Suspension of the Performance of Divine Service, the Magistrates having been oblig'd to convert all the Churches into Hospitals.

It is certain that there is a Misunderstanding between the Marshals Broglie and Bellisle, and that as the Duke de Brissac is charg'd with the Dispatches of the former, so the M. de Beause is entrust'd with those of the latter.

By the Charming Betty, Capt. Wedderburn, Letters from St. Christophers, dated August 9, give the following Account of the Damage done to the Shipping in and about the Leeward Islands, by a Storm, which hap- pen'd the 29th of July, 1742.

Part of Basse Terre, St. Christophers.

Ship Nelly, Lyon Master, for Glasgow, drove ashore, the Ship, with 137 Hogsheads of Sugar, all lost.

Ship Margaret, Snow, for Bristol, ashore, with about 70 Hogsheads of Sugar, all lost.

Ship Charming Betty, Wedderburn, for London; Ship Vigor, Attwell, for London; Ship Duke of Argyll, Prad, for Liverpool; Ship Resolution, M'Namara, belonging to Boston from Guiney. These put to Sea, and returned without any Damage but the Loss of some of their Craft.

Snow St. Peter, Cooper, from Gibraltar; Ship Expedition, E'worthy, for London. These rid it out.

Two Schooners drove out, and having no Hands on board are given over for lost.

Port of Sandy Point.

The Adlington, Coppell; the Ann, Brotherson; the Fanny and Sally, Nevin; the Ann, Dunster; and the Betty Brig, Dennis; all for London. Put to Sea, and are returned, except the Adlington. If proceeded on his Voyage, may do well; if not, 'tis believed her Case is bad enough.

Nevis.

The Vernon, Brown, for London. She loaded at St. Christophers, went up to Nevis, drove out from thence, and put into Sandy Point with the Loss of her Mast, and of about 70 Hogsheads of Sugar.

Monferrat.

The Katherine, Eggleton, for London. Put into Nevis, lost her Masts, and great Part of her Sugars wash'd out; was to have failed on the very Day the Gale happened.

The Clayton Snow, Ellison, of Liverpool. Lost her Masts, pretty much damaged her Sugars, and put into Basse Terre.

The Friends Increase, Hixon, of Liverpool. Put into Sandy Point, some of her Sugars wash'd out.

The Richmond, Rigby, of Ditto. Put to Sea, but supposed to do well.

A Schooner loaden with Rum. Lost at Sea.

The Seahorse, Capt. Read, arrived at Bristol from Barbados, left that Place the 17th of August, and brings Account that they had no Hurricane. The Lark Man of War with all the Ships under her Convoy from Portsmouth, arrived at Barbados about the 5th of August. They stayed about five Days, and then proceeded for Jamaica.

The Tryal, James Thompson Master, bound from Scotland to the Humber, was lately lost near Aberdeen.

Yesterday at a Court of Burgesse the Officers for the City and Liberty of Westminster for the ensuing Year, were sworn in before the Deputy High Steward, in the Town Court-house adjoining to Westminster-hall.

Lord George Lenox, second Son to his Grace the Duke of Richmond, was last Night much better, and his Physicians are in hopes of his Recovery.

From the London Gazette.

Kensington, Oct. 4. This Day M. Walsenberg, Minister from the King of Sweden, having a private Audience of his Majesty, acquainted his Majesty, That he had received Orders from the King his Master, to desire, in his Name, his Majesty's good Offices, for putting an End to the War in the North, and procuring a safe and honourable Peace between the Crowns of Sweden and Russia; to which his Majesty was pleased to answer, That he would immediately employ his good Offices as desired.

Carlton-House, Oct. 3. This Day Signior Grossi Testa, sent from the Duke of Modena, had his first private Audience of his Royal Highness the Prince of Wales.

Philosophica Dissertatio de Gravitate. Per R. Mather,
Arm.

The only short and infallible Cure

for that reigning Disease the SCURVY, and all Scorbutick Humours,
tho' arriv'd to the highest and most inveterate Degree, or of
ever so many Years standing, and that without any sensible Evac-
uation or the least Purging, which by an unaccountable Mistake
is generally advised, although always found rather to increase and
confirm the Scurvy than cure it.

By the so much famed and most pleasant Chymical DROPS:

WHICH, without the least Trouble,
Confinement, or any Disorder whatever, do at once strike
at the true Cause of the Scurvy, and intirely destroy it, and all
Scorbutick Humours and Effects, Root and Branch, so as never to
return again, as many Thousands of both Sexes have experienced,
and as all who take them, in 3 Days time will be convinced; for
they almost instantly alter the morbid State of the Jaices, purify the
Blood, sweeten all the Fluids, cleanse them from Impurities, and
directly clear the whole Habit from all Spots, Bloches, black and blue
Marks, Itching, foul Eruptions, or Breakings out, Weariness
of the Limbs, languid Heaviness of the whole Body, wandering
Pains, Weakness of the Back, and all the vast Variety of Sym-
ptoms by which the Scurvy imitates and often lies concealed under
the Appearance of the Rheumatism, and many other Distempers.

And for Strengthening the Stomach, immediately creating a good
Appetite, causing a regular and easy Digestion of Food, and curing
all wind'y Effects and Disorders of the first Paſſages (whence pro-
ceed Head-ache, Vapours and other Indispositions) no Bitter nor any
other Medicine upon Earth can compare with them, insomuch
that beides infalliby curing the Scurvy in all its Shapes and Ap-
pearances, they also assur'dly and immediately cure the Green-sickness
in Virgins, Worms of all Kinds in young or old, and almost all
other Chronick Diseases, (which are chiefly occasioned by Indigestion
and flatulent Crudities in the Stomach and Bowels) and certainly
prevent Fevers, Agues, and other acute Illnesses.

They are wonderfully Cordial and Restorative, strengthen and
enliven the whole Machine, and soon as taken, make the Patient
pleasant Lightfom, brisk and Vigorous to admiration, and are
good for all Sorts of Persons, to preserve as well as to procure a
sound and healthy State of Body.

But the great Reputation these somuch fam'd and pleasant Chy-
mical Drops have so universally gain'd among Persons of Eminence,
for their suddenly and infallibly curing the Scurvy and all Scorbu-
tic Humours, and other Chronick Diseases, in such an easy and
agreeable Manner, have occasioned many to imitate them, some
under the same, and others under other Names: Be careful there-
fore not to be deceived, but be sure to have the Right, which by
the Author's special Appointment, are to be had only at the Gen-
tewoman's, at the Two Blue Posts, in Haydon-Yard, in the Mi-
norities, at 3 s. 6 d. a Bottle, with Directions.

**The GRAND SPECIFICK for
Cleansing and Strengthening the Reins, &c.**

**A Medicine that hath gain'd so much
Credit, for these many Years it has been publish'd, that
not one of the many Pretenders to cure the like Cases, has
at all hinder'd the just Reputation this first and only Specifick
for these Purposes, hath obtain'd, by its most noble Effects;
for it doth not only cure such difficult Cases, which no other
Medicine can: But in every ordinary Case, one Bottle will
do more real Good than four, that are sold by any of the com-
mon Pretenders, as has been sufficienty attested by many
Persons of Worth and Reputation that have found the desired
Effects, and declared it to Mr. Sandwell.**

It may be certainly depended on, as absolutely effectual,
for carrying off, by Urine, safely and speedily, all the Relicks
of secret Injuries, Remains of pernicious unskillfully prepared
Mercurials, Glects or Weakneses, thru' tedious or ill manag'd
Cures of the Venereal Disease, or from Self-pollution, inad-
equate Coition, &c.

Also any Weakneses of the Vessels from Wrenches, Strains,
Blows, or Falls, and all other Obstructions in the Urinary
Paſſages, even Stranguries, Ulcer, &c. are perfectly cured
by it, be they of ever so long standing; whieh Relicks and
Ailments are, in Part, discovered by these following Sym-
ptoms, viz. Weakness and Pain in the Back, a Sharpneſs in the
Urine, its strong Smell, Film or Hair as it were floating
about in it, and, in fome, too frequent Occasion to make it.

This noble Specifick is also singular and very extraordi-
nary Use and Efficacy, where there is any Gravel, or even
small Stones, Slime, or any other Matter that obstructs the
Urine, bringing all away in a few Times taking, with Safety,
and to the very great Satisfaction of the Patients, as has been
happily experienced by great Numbers of both Sexes, and partic-
ularly by a Gentleman, whose Case has so often been men-
tioned in this Advertisement, by a Certificate of his Cure;
who, on taking but a little of this noble Specifick, voided
above an Ounce of Gravel, and was cured of an infupportable
Pain about his Loins, &c. by a short Continuance of it.

It also strengthens and recovers, after a particular Manner,
all Relaxations of the Vessels, confirms the Parts, bringing all
into Order, and thereby perfects the Cure to Admiratio. It
is a very pleasant Medicine, and will be found of uncon-
mon Benefit to Mankind, beyond Expectation, which is the Rea-
son of its being made publick, and to obviate the Ignorance
of Pretenders in all the difficult Cases above-mentioned.

One Bottle, in most Cases, is sufficient for a perfect Cure,
as you will see by the Directions given with it.

Sold at 7 s. 6 d. the Bottle, at Mr. Sandwell's Toy-shop, at
the Griffin, the Corner of Bucklerbury, in the Poultry.
